

Premium Medical Care Patient Portal Announcement

In our ongoing efforts to improve the quality of care that Premium Medical Care provides, we are pleased to announce the availability of our Patient Portal to better serve you. The Patient Portal is a secure, web-based system that allows you to view certain aspects of your medical record. The portal also allows you to securely communicate with us between visits for *NON-URGENT* issues and questions.

We will only activate your Patient Portal account through the use of a personal email address that you provide to us. Once you have authorized us to activate your Patient Portal account, we will send a Welcome Email to the email address you provided to us. This Welcome Email will provide you with the information necessary for you to login to the portal, view your health information, and begin interacting with us. When we “post” information to your Patient Portal, you will receive an email notifying you that new information is available and you will login to the portal to view the information.

What Can I do with the Portal?

- You can view your current medications, medication allergies, and medical problems. The medical problems listed may be limited to only those problems for which we are providing care.
- You can view test results.
- You can send *NON-URGENT* messages to us and we can send messages back to you.
